

BILL NO. S-77-09-17

SPECIAL ORDINANCE NO. S-207-77

AN ORDINANCE approving a contract with
Bruning Division A. M. Corp. for
materials for the Technical Services
Department.

BE IT ORDAINED BY THE COMMON COUNCIL OF THE CITY OF
FORT WAYNE, INDIANA:

SECTION 1. That the contract dated August 10, 1977,
between the City of Fort Wayne, by and through its Mayor and the
Board of Public Works and Bruning Division A. M. Corp., for:

1 Cat. #80-876 Bruning Model 876 Automatic 3
Roll Feed 42" Engineering Whiteprinter
with trade-in of 1969 Bruning "870" \$22,625.00

all as more particularly set forth on City Utilities Purchase
Order No. 9152, which is on file in the Office of the Department
of Purchasing and is by reference incorporated herein, made a
part hereof and is hereby in all things ratified, confirmed and
approved.

SECTION 2. This Ordinance shall be in full force and
effect from and after its passage and approval by the Mayor

Councilman

APPROVED AS TO FORM
AND LEGALITY.

Paul H. Burns

Read the first time in full and on motion by Burns, seconded by

Hinga, and duly adopted, read the second time by title and referred to the Committee on City Utilities (and the City Plan Commission for recommendation) and Public Hearing to be held after due legal notice, at the Council Chambers, City-County Building, Fort-Wayne, Indiana, on _____, the _____ day of _____, 19____, at _____ o'clock _____ M., E.S.T.

DATE: 9-13-77

Charles W. Westerman
CITY CLERK

Read the third time in full and on motion by Burns, seconded by Hinga, and duly adopted, placed on its passage.

PASSED (~~LOST~~) by the following vote:

Memorandum

To H.P. Wehrenberg, Board of Public Works

Date August 10, 1977

From Ruth Winget, Purchasing Department

Subject Bid Ref. No. 437, Automatic Whiteprinter Machine

COPIES TO:

H. Biggs
A. Hepler
D. Bodeker

Herewith are bid documents (Bid No. 437) relating to Purchase Order No. 9152 prepared favoring Bruning Division A.M. Corp. for One (1) Automatic Roll Feed Whiteprinter Reproduction Machine for Technical Services Department, net price \$22,625.00 including trade-in.

Attached are the following documents in support of the recommendation for acceptance of Bruning Division A.M. Corp. bid:

1. Copy of tabulation sheet.
2. Purchase Order No. 9152.
3. All vendors bids.
4. Memorandum from Technical Services Department.

It is urged that in referring this bid to the City Council for enactment of an ordinance, that all of the attached items, together with this memorandum (or copies), be included with the proposed ordinance.

Please make sure that no confirming Purchase Order Number (s) is given to Bruning Division A.M. Corp. until evidence of Council approval is furnished to the Purchasing Department.

Ruth Winget

Date: June 8, 1977

From: Donald E. Bodeker

Subject: New Reproduction Machine

COPIES TO:

Our present reproduction machine is a Bruning "870" which has been in service nearly 8 years. This machine can no longer keep up with our increasing needs and is also on the verge of some extensive repairs.

Since the purchase of a new machine is inevitable, we have been looking at equipment and talking to sales representatives the past few months. Several of us recently had the pleasure of visiting General Telephone Company for a demonstration of their Bruning "876." Some of the advantages of this machine over our present equipment are as follows:

- A. The speed is greatly increased which reduces turn around time and thereby increases efficiency. The quality of prints and intermediates is also greatly improved.
- B. Paper waste is negligible because the machine automatically trims each print. At the present time, many prints must be trimmed by hand.
- C. The operator only handles originals as the print paper is automatically fed by an internal system. Roll stock is used almost exclusively which eliminates the need to count sheets and saves on paper costs as well.
- D. We would be in a position to encourage business from other City and County departments in the building which, in turn, would increase our income.
- E. We are faced with the need for part time help in the reproduction room. The new machine would make this unnecessary which will save on labor costs.

We have examined literature on several machines but recommend the Bruning "876" for three primary reasons:

- A. It is the only machine with 3 roller capacity. This feature would save the operator time and inconvenience as the rolls would not need to be changed as often as other machines.
- B. Bruning has 2 servicemen available locally. This is important because response time is critical when a breakdown occurs.
- C. The 8" venting system on the present machine is compatible with the Bruning "876." Some machines require a larger vent which would entail a new venting system being installed.

A machine of this type will cost in the area of \$22,000 to \$23,000 after trade-in. Due to the amount involved, the Purchasing Department recommends we advertise and receive bids.

It should be remembered that our reproduction room is run in a businesslike manner with the users actually paying for the entire operation. With the increased efficiency a new machine would provide, we could recoup the purchase cost in just a few years.

Please advise if we may proceed with the preparation of a requisition and specifications.

To Howard A. Biggs

Date July 15, 1977

From Donald E. Bodeker

Subject Reproduction Machine

COPIES TO:

L. Foland

As a follow up to my previous memo of June 8, regarding the purchase of a new reproduction machine, the program has been reviewed with Don Foland and the following supportive information is submitted for consideration.

The present Bruning 870 whiteprinter will be eight years old this fall. It was purchased by the Water Engineering Department and was expected to last seven to ten years. Since moving into the City-County Building, however, it's availability to additional departments along with greater printing demands from the engineering departments has increased the load to the point it has more than outlived it's normal life span.

A review of the condition of the equipment with the reproduction machine operator, Allie Snyder, indicates numerous items are giving problems and will require replacement. The major items are as follows:

1. Heaters in the developer section have gone bad and need immediate replacement.
2. Printer bands are frayed and should be replaced.
3. The sealing sleeve is worn smooth in areas and will also require replacement.
4. The lamp, shade and duct assembly are deteriorated and will require replacement soon.
5. The transformer is very noisy which indicates deterioration. It could go out completely at any time.
6. General cleaning and adjustments are needed.

A ball park estimate of labor and materials to replace the above items would be in the vicinity of \$3,000. The new sealing sleeve alone would cost about \$250, plus installation, and the transformer material cost is between \$700. and \$800.

If the transformer should go out completely, there would be an exceptionally long delay in receiving and installing a replacement transformer. During that period, our blueprinting needs would have to be supplied by a commercial establishment. This would create a major delay in turn around time and the cost would be two to three times greater than our present in-house operations.

As previously indicated, the new Bruning Model 876 we propose purchasing has several advantages, part of which we can place a dollar value on and part of which we cannot. First, increased productivity will reduce printing time and free the operator to perform other functions. This will allow him to better observe the usage of the Xerox 840 machine, which currently is running in the "red." Such observation can reduce the present problem of prints being made and not accounted for.

A second advantage is the automatic trimming feature which will permit us to buy materials in roll stock rather than cut sheets. Based upon recent years usage of cut sheets, the use of roll stock should save about \$600. per year in reduced material costs alone.

With the increased speed and other capabilities of the new machine, we could also encourage business from other City and County departments. This in turn would add income to the operation due to increased usage.

Finally, as indicated in my memo to you dated July 8, a price increase of \$900. is anticipated by the end of this month for the proposed Bruning Model 876. If we can expedite the purchase requisition, bidding and purchase order, we can possibly avoid that additional cost.

I trust the above information will provide sufficient additional details that we can proceed with the acquisition of this equipment. If not, I suggest that we sit down with those individuals who have questions so any remaining problems can be resolved as soon as possible.
